

Post Operative Results With Vitälzým Testimonials

POST SURGERY

I find it difficult to describe how wonderful I feel! In December I was a kidney donor. Of course I was extremely uncomfortable. I was on the way to recovery when in March I got the flu. I do not have enough hands to cough and sneeze, and felt as bad after the flu as I had in January. My boss suggested Vitälzým and I was not convinced it would help, but decided to try it. It is amazing!!! After only one and one half days I realized I felt much better. I had taken Vitälzým for about three weeks when I started wondering if I had just actually recovered and didn't really need the Vitälzým. I stopped taking it for only about one half of one day when I realized how good it is.

This last weekend (the middle of May) I worked almost like it was before the surgery. I got so much done it was scary. Thank you for finding the answer to my problem. You have a wonderful product and you won't find the day when it is not a part of my medicine cabinet.

A side note. I gave a bottle of Vitälzým to a good friend after her knee surgery and she not only quit taking the pain medicine she had a prescription for but she also quit taking Tylenol. You should also tell people that Vitälzým is good for black eyes also. A friend of mine got a shiner on Monday and needed to look good for a convention on Friday and with the help of a lot of Vitälzým, she looked normal with no makeup on Friday. She was amazed at how quickly it worked for her.

My name is Dean Wilson. I am 56 years of age. I had bypass heart surgery last year where they put 4 stents in my heart. One of the main arteries to my heart was almost closed. Six months after the surgery the doctors told me that the arteries had plugged back up. He told me that there was nothing more they could do for me and basically sent me home to fend for myself. So I went to see Dr. Murphy.

When I came in to see Dr. Murphy my circulation was very poor in my legs, I couldn't sleep on my left side with my knees together and could only tolerate riding in a car for 45 minutes to an hour. I could not stand up or walk without holding on to things (like doors). I felt very weak and had difficulty breathing. Dr. Murphy started me on Vitälzým+ as a part of my treatment program. After 1 week the pain was almost completely gone in my knees. My legs no longer hurt and I am able to walk without holding on to doors. I have also noticed that the longer I take the Vitälzým+ the better things are getting for me.

Dr. Murphy assures me that Vitälzým+ is playing an important role slowly but surely cleaning the congested slug out of my arteries improving my circulation and healing the tissue in blood vessels. I go back in 4 months for another sound gram of my heart and coronary arteries and I am optimistic that there will be visual improvement to go along with the subjective improvement of symptoms.

I would like to thank Dr. Murphy and the author of the tape that Dr. Murphy gave to me: Dr. Wong.
